**Subject:** Mogul Mine and Gold King Mine assessments

Kirstin,

The proposed scope of work looks good. The only thing that I would add is to look at the Shaft on the Mogul and evaluate the options to seal it in the event that water levels would rise if the bulkhead were sealed more effectively.

The GK will potentially require some underground entry tasks pending the outcome of the portal rehab.

The costs may or may not be an issue. I suggest that you submit it as is, and we'll talk with Mark Rudolph to work it out. The sooner you put this in front of Mark the better, so thanks a lot for getting this to me when you did.

Thanks,

Steve
